

1. First import company names, setup the UTI like below “Company Names” set to default. Then drag company names file > codes.txt. This will fill your database with the company name and Tickers.

2. Create the Historical setup in the UTI as below and set it default. Open the folder with the data for example Pure Stocks Drag a-b.txt, c-f txt etc, this will fill your database with data. **Date and numbers** are important make them exactly the same as the image below. **Do not tick Filter Weekends**, *Cooltrader data does not contain weekends.*
